BI developer with hands-on experience owning the full reporting chain in a manufacturing plant, from SQL extraction and star-schema modelling to Power BI delivery and automation. Used to working directly with production, quality, maintenance and IT teams to turn their needs into reliable dashboards. Looking for a BI Developer or Data Analyst role in Perth, contract or permanent, available immediately. My English is not perfect yet and I am actively improving it during my time in Australia, but I make up for it with strong hands-on expertise in BI and data.

EXPERIENCE

BI Developer (apprenticeship)
Sep 2025 – Aug 2026

K-LINE / LIMA — Groupe Liébot (window manufacturer), Saint-Vulbas, France

- Owned the decision-support chain end to end (ETL, modelling, Power BI delivery) for the plant's departments; gathered and translated requirements from business users.
- Rebuilt the plant's critical production-delay report (4 SQL Server sources, 54 dependent semantic models): 121 to 64 pages and refresh time cut from 7–15 min to 3 min 30 through SQL rewrites, date windows and DAX clean-up.
- Mapped and audited 214 BI elements and designed the report's migration to a star-schema architecture.
- Centralised 113 reports in a single hub; rebound reports to new datasets by script (PowerShell + Power BI REST API), preserving 855+ views of usage history.
- Migrated the IT service desk report to the GLPI database (MariaDB) and built a maintenance KPI report (MTBF, MTTR, failure rate) from CMMS exports.

Data architecture & AI classification (academic project)
Jan – Mar 2026

IUT d'Annecy, France

- Built an OLTP model from a large raw IMDb dataset, cleaned and prepared in Python; designed an OLAP model and SSAS cube on SQL Server, connected to Power BI.
- Deployed a Python sentiment-analysis model to classify user reviews.

Digital communication & operations officer
Mar – Jul 2025

Eliken Services (home-care provider), Thonon-les-Bains, France

- Streamlined staff-management workflows and administered the company's digital platforms.

IT Intern — application design
Apr – Jun 2024

Thales AVS, Thonon-les-Bains, France

- Analysed warehouse staff pain points in a complex SAP environment and delivered mock-ups and an Agile specification (user stories) for the development team.

EDUCATION

BUT Informatique — Data & AI track (3-year Bachelor's degree in Computer Science)
2026

IUT d'Annecy, Université Savoie Mont Blanc, France · Thesis: rebuilding a production-delay report in a BI environment

DUT Informatique (2-year diploma in Computer Science)
2024

IUT d'Annecy, France

SKILLS

BI & reporting	Power BI Desktop & Service, DAX, Power Query (M), star-schema / OLAP modelling, SSAS, Deneb, Excel
Data & databases	T-SQL / SQL Server, MariaDB, PostgreSQL, Oracle, Python (pandas, scikit-learn), KNIME
Automation	Power Automate, PowerShell, Power BI REST API, SharePoint, C#; Azure (foundations)
Languages	French (native), English (B2 — professional)
